Summary

QA Analyst with experience in automating test, full-stack web development, and software design. Excel at collaborating with development teams to enhance continuous integration practices and improve software reliability. Proficient in Java, JavaScript, SQL, and a range of testing frameworks. Focused on delivering high-quality software solutions that prioritize customer experience.

Technical Skills

Languages: Java, JavaScript, SQL, Python

Automation: Selenium, ConformIQ, Hexawise

Testing: Postman, JUnit, TestNG

Web: React, Spring Boot, Express, jQuery, Node.js, Bootstrap, Tailwind CSS

Tools: Jenkins, Git, GitHub, Jira, Confluence

Database: MySQL, MongoDB

Certifications: ISTQB Certified Tester Foundation Level (2024) and ConformIQ Creator Green Belt (2022)

Experience

Royal Bank of Canada

Jun 2022 – Jun 2024

QA Analyst (Contract through Genesis10)

Minneapolis, MN

- Developed and maintained 500+ automation scripts using RBC's custom keyword-driven **Selenium** automation framework to support backend validation and UI functionality as part of the development pipeline.
- Assembled 20-30 automated **functional test** scripts per sprint, contributing to a **regression** suite of 300+ tests that supported **CI/CD** and minimized defect leakage throughout the app migration from PCF to OCP.
- Engineered **Jenkins** pipeline integrations to support automated test executions, CI/CD deployment verification, and quality gates, reducing feedback loops by 30%.
- Collaborated with performance engineers to execute load testing by simulating high-traffic conditions (10 dummy users executing 500 transactions/hour), uncovering potential bottlenecks.
- Developed **integration test** scripts to validate scheduled file transfers and data pipelines, ensuring 100% uptime and accurate data exchanges between systems.
- Facilitated **UAT** sessions with 7 business partners across 2 departments, documenting 100+ test scenarios and capturing feedback that led to 20+ enhancements pre-launch.
- Incorporated **white-box**, **black-box**, and **boundary value analysis** testing methodologies, increasing test coverage by 50% and identifying 200+ defects, leading to a 20% improvement in product stability.
- Documented testing processes, test cases, and outcomes using tools like **JIRA** and **Confluence**, improving team onboarding and future test cycle efficiency by 30%.
- Actively supported **Agile development** by contributing to **daily stand-ups**, **sprint planning**, and **retrospectives** with cross-functional teams and stakeholders.

Genesis10

Feb 2022 – Jun 2022

Software Developer Trainee

Minneapolis, MN

- Constructed 4 **full-stack web applications** using **Spring Boot**, **React**, and **MySQL**, building dynamic, user-focused web applications featuring authentication, data visualization, and data management operations while strengthening skills in **Java**, **SQL**, **JavaScript**, **CSS**, and **HTML**.
- Programmed **RESTful APIs** to enable seamless communication between client and server, improving data flow and system efficiency.
- Managed **GitHub** for version control and team collaboration across 5+ feature branches, resolving merge conflicts and maintaining consistent code quality through peer reviews and pull requests.
- Expanded proficiency in **DevOps** principles, using Jenkins and Docker for containerization and deployment, accelerating application delivery.

Education

University of Minnesota - Twin Cities

Bachelor of Arts in Computer Science

Sept 2018 – Dec 2021

Minneapolis, MN
